We'll plan to be there at 9am. In the past you all have had the disposable FRC and escape mask. Would you have those?

I'll get you their names...may be as many as four + me. I also told Ernie he could walk around with us.

Brad,

A Site visit for March 4 will be great. Please send me a list of who you will attend and what time you would like to arrive at the Site to begin. I anticipate we will want to be out walking around. If so, I will be sure we have hard hats, safety glasses, FRC, escape respirators and ear plugs. Folks will need to have steel-toed shoes. We will also do a short safety video before going out. I can also arrange transportation and have access to the river by Air Products ahead of time as needed. Please let me know and see you then. If you have questions, please call or email anytime.

Kevin
